

FLUORIDE RINSE PROGRAM

Dear Parent,

Tooth decay is a disease with a high prevalence in children. One means to prevent dental decay is through a sodium fluoride mouth rinse program. A program is available for your child at school. It is a weekly "Fluoride Rinse."

Your child will be given a fluoride solution to swish around the teeth for one minute under the supervision of trained personnel. This will continue once a week for the remainder of the school year.

If you would like for your child to take advantage of this excellent opportunity to prevent tooth decay, please fill in and return the application below on Registration Day so we may order supplies. There will be no charge to you for this program.

If you have any questions, you may contact the school office.
